Share a match with a coach

If we are affiliated with a coach, the previously created match will be immediately visible in the player's matches within the coach's application.

The coach, once logged into the app, must select the 'Matches' button from the main screen.

And he will have access to the list of matches of all his affiliates, in descending order of date.

If the match is the last to be played or modified, it will be the first in the list of matches.

At this point, it will be sufficient to press on the game to begin taking scores.
