Unforced Error

If you wish, the system allows you to indicate, for unforced errors, whether the ball went into the net or out of bounds.

If desired, the system allows us to indicate, for unforced errors, whether the ball went into the net or out of bounds.

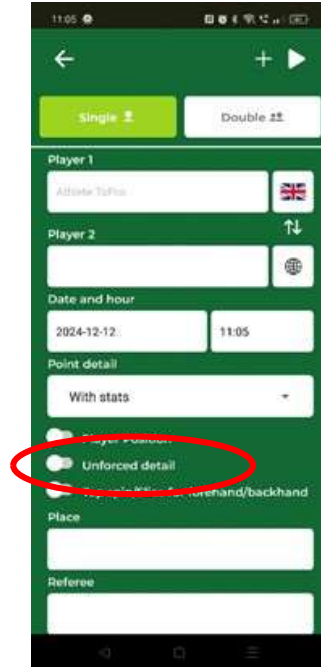

For this game, the buttons for defining unforced errors will be detailed in the service interface and in the definition of the outcome of the shot. In particular, for the service, for both the first and the second, the screen will change to detail the type of error

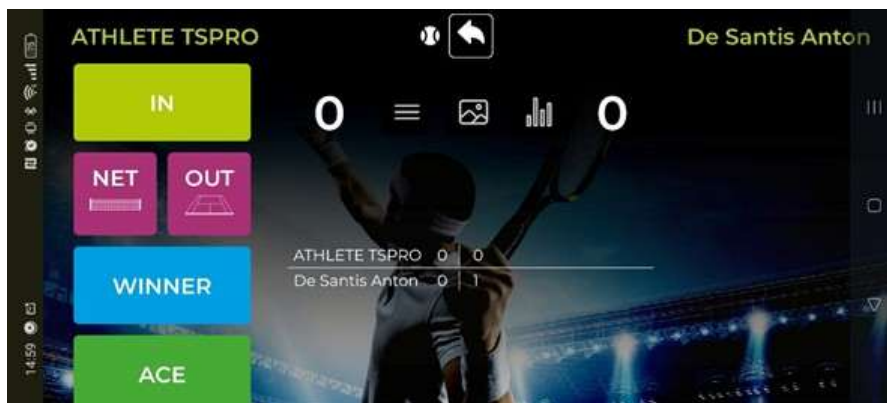

Even in the definition of the unforced error, it will be possible to decide whether the ball went into the net or out of bounds
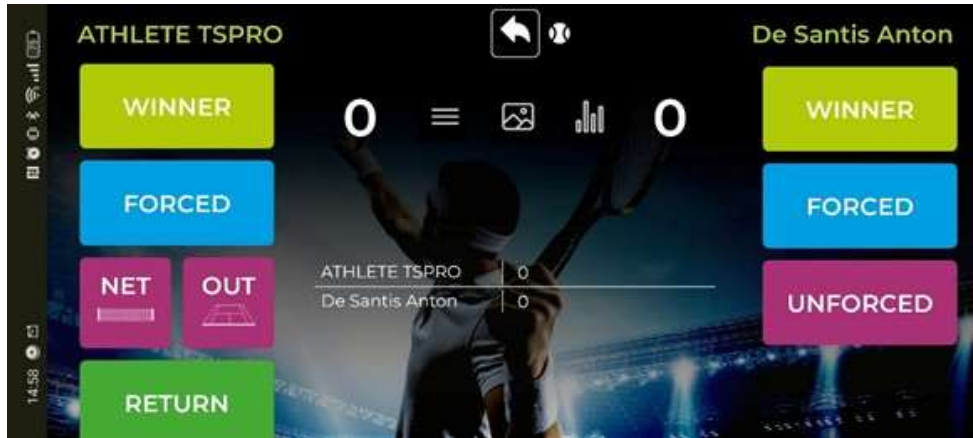

If you wish to use this configuration for all your matches, you can change your profile through the application menu by accessing the 'Settings' menu
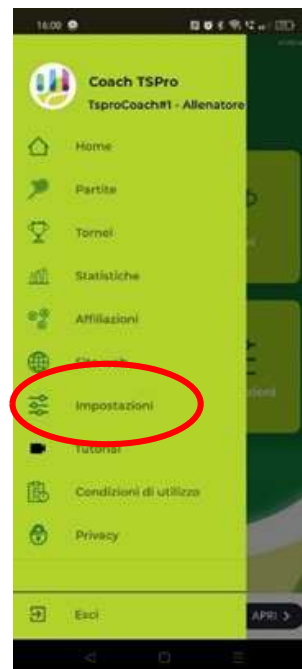

From which you will access the configuration menu of your profile, then proceed to select the 'Game Modes' button
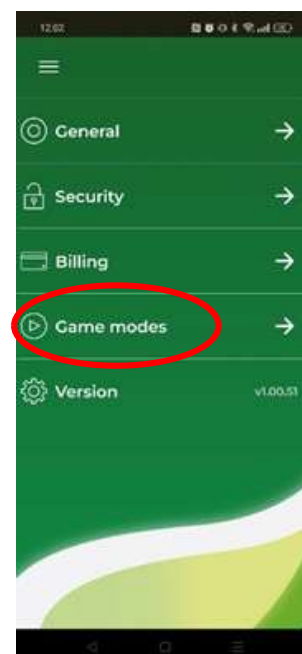

From which you will access the configuration menu of your profile, then proceed to select the 'Ball Position Stats' button
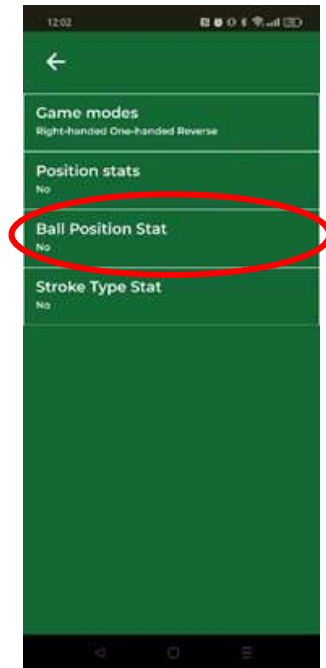

By confirming the configuration change, the system will propose the flag set with the new configuration in the next match.
